

Master DSA

from **Absolute Zero** — Step by Step

Data Structures & Algorithms • Problem Solving • Interview Prep

Complete Beginner Series

THE MISCONCEPTION

Why do beginners go **blank** during coding?

What they learn

- Java Syntax
- Loops
- Conditions
- Functions

≠

What they forget

- Data Structures
- Algorithms
- Problem Solving
- DSA !

WHAT IS DSA?

D Data

S Structures

A Algorithms

Data Structure

A way to organize and store data efficiently so it can be accessed and modified quickly.

Algorithm

A step-by-step process to solve a problem efficiently using logic and computation.

You use DSA every day — without realising it.

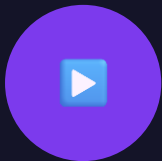

Instagram

Millions of posts sorted, filtered & ranked using DSA

Google Maps

Shortest path algorithms find the fastest route

YouTube

Recommendation engine uses graph & search algorithms

WhatsApp

Message queues & hashing power real-time messaging

WHY COMPANIES ASK DSA

**They don't want just
coders.**

**They want
Problem Solvers.**

- 01 DSA tests how you think, not just what you type
- 02 Efficient code saves millions in infrastructure costs
- 03 Problem-solving is a universal engineering skill
- 04 Top companies: Google, Amazon, Meta, Microsoft — all ask DSA

WHAT WE'LL COVER

Complete A-to-Z DSA Roadmap

Arrays

Strings

Recursion

Linked Lists

Stacks & Queues

Trees

Graphs

Dynamic Programming

Interview Questions

And the best part about this series is...

We are going to learn daily.

One day at a time. One concept at a time.

And every video in this series will be under 10 minutes.

THE TRUTH

Problem Solving is a Skill.

Just 1 hour daily of consistent practice is enough to improve dramatically.

Nobody masters DSA in a day — but everyone can with practice.

This series is built from scratch, specially designed for absolute beginners.

Starting Tomorrow:

Basics of Java

```
// First lesson preview
```

```
for(int i=0;i<10;i++){
```

```
    System.out.println("Helloworld");
```

```
}
```

What you'll learn:

- Flow Chart
- Variables
- Operator
- Conditional Statements
- Loops
- Functions and Methods
